Biography

Jeff Black is currently the Manager of Instrumentation & Control Testing and Repair Services with Westinghouse Nuclear Parts Operations. Jeff is responsible for the NPO Commercial Dedication Electrical testing process and the Return Material (RMA) Repair process for I&C products. Jeff is also an IPC-A-610 Certified Trainer. Jeff has thirty two years with Westinghouse, primarily in the area of I&C Engineering, Equipment Qualifications, Project Management, and Manufacturing.

Abstract

Westinghouse CDI programs have evolved since the 1990's. From performance (Form, Fit, and Function) variables to Seismically Sensitive and Brokered Parts for traceability verification. Evolving from the Appendix B Vendors to Commercial Vendor Surveys of the current generation of Manufacturer. All leading to today's multi-process complex world of Commercial Dedication.
