Biography – John Dinyari

John is Solutions Development Manager for Supply Chain Solutions, and has been with Scientech a total of 3 ½ years. In addition to developing new Business Intelligence services for our industry John manages these projects for SCS. Before Scientech, John worked internationally in the petrochemical industry as a buyer of engineered equipment, directed engineered equipment procurement for upgrade projects, and worked in business development bringing new products and services to market. John is based in Raleigh-Durham, North Carolina.

Biography – Lisa Bradley Ankrom, C.P.M.

Lisa Bradley Ankrom has over 20 years experience in Strategic Sourcing and Supply Chain Management and holds a C.P.M. certification. She recently joined Scientech as a Solutions Development Manager in the Supply Chain Solutions group. Previous to Scientech, she was employed by Enporion as the Director – Channel Sales responsible for managing and building Enporion’s indirect channel partner relationships and public sector growth. With Enporion, Ms. Ankrom held positions in Sourcing, Contract Management and Product Management. Previous to Enporion, she worked as an Account Manager and Regional Purchasing Manager in the wireless telecom industry. As an Account Manager her focus was on maintaining customer relations, sales and training. In her purchasing role she was responsible for sourcing all building facility needs as well as for all cell site construction and engineering support. Ms. Ankrom holds a Bachelor of Arts Degree with a major in Business Administration/Management from St. Leo College.

Session Abstract

The Supply Chain Success Stories Session will present strategic initiatives and process improvements that apply to single and multisite nuclear, fossil and T&D supply chains. We will learn the successful methods and processes applied to integrating the independent supply chains within a large, multisite company into a streamlined operation.

A success story will be shared with the methods applied to effectively reduce backlogs of Over, Short, Damaged, Discrepant items. Learn how a company powered up its resources to rewrite its inventory descriptions to follow a consistent taxonomy reducing “unknown items”. Finally, before launching into the Vendor Exhibition, we see how a successful Vendor Managed Inventory system was able to recue transactional volume.
