

MOSI Museum of Science and Industry provides children and adults with fun and interactive learning experiences.....Sponsored by Integrated Resources

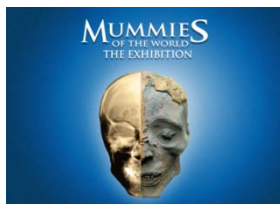

The Children's Science Center at MOSI is the largest children's science center in the country. It is a uniquely designed space for children all ages with over 450 hands-on activities. Experience bouncing in a moon walk, racing down a slide, design and build various objects, experiment with weight wheels, gravity, and momentum and much, much more.

Experience the adventure of walking the Sky Trail® Rope Course. The course features 36 elements on a 12-36 foot high, multilevel structure. The ropes course is designed with challenging high-energy feats ideal for all ages with a 42 inch minimum height. Signed waivers must be presented at the Rope Course.

Watch a movie in the IMAX® Dome. The projector in the IMAX® Dome Theatre at MOSI is the most advanced, highest-precision and most powerful projector ever built. The dome shaped screen provides 10,500 square feet of visual imagery and is ten times larger than a conventional 35mm frame.

The "Mummies Around the World" exhibition offers guests a rare chance to experience both naturally and intentionally preserved mummies from around the globe – some dating as far back as 6,500 years. The exhibit reveals how the scientific study of mummies provides a window into the lives of ancient people, offering insights into past cultures and civilizations.

The Museum offers three floors of activities:

Floor 1

- Visiting Exhibit – Mummies Around the World
- Gift Shop

Floor 2

- IMAX Dome Theatre
- Bay News 9 Weather Quest
- Disasterville

Floor 3

- The Amazing You Exhibit
- High Wire Bike

Due to the number of expected attendees, each guest must select one of the packages below prior to the outing. Please notify Rose Kieffer of your selection. rkieffer@curtisswright.com or 727.669.3055
