

## **“T & D Breakout Session”**

---

### **JOHN MULLENS**

Buyer Lead, Energy Delivery Procurement  
Arizona Public Service Company  
602-371-6261  
[John.Mullens@aps.com](mailto:John.Mullens@aps.com)

---

### **Biography**

John is the Transmission & Distribution Procurement Leader for Arizona Public Service. John has been with Arizona Public Service for 34 years and has held multiple positions within Fossil; Gas & Oil; and Nuclear which include: Supply Chain Manager, Palo Verde Stores; Supply Chain Manager, Palo Verde Procurement; Supply Chain Manager, Generation Engineering; Corporate Materials & Services Business System Dept Leader; Corporate Inventory System Team Leader; and Four Corners Materials Supervisor. John provided a key role on an industry initiative supporting the NEI/Nuclear Supply Chain Strategic Leadership (NSCSL) rewrites of AP-908, Materials and Services Process Description. He also supported a second initiative by participating on a team to address the inconsistencies in the interface points between Materials and Services (AP-908), Work Management, (AP-928), and Equipment Reliability, (AP-913). John also provided the functional interface to APS' development of their in-house Materials Logistics Information System. John is based in Phoenix, Arizona.

### **Abstract**

This purpose of this session will be to discuss how we can encourage more participation in RAPID from the non-nuclear side of the industry, specifically from Transmission & Distribution.

Possible subject areas would be:

- Naming conventions (Short & Long Part Descriptions)
- How we might utilize RAPID resources to improve the identification of common parts to enable more effective searches in RAPID
- T&D Standards impacting sole source decisions
- Obsolescence
- Investment Recovery Opportunities
- Potential need for RAPID Training
